

# Clover at 500,000

With half a million Clover devices in the marketplace, merchants are running their businesses more effectively, saving time, and getting important jobs done more easily. Here's a look back at some of our milestones.

**500,000**  
Clover devices  
now in market.

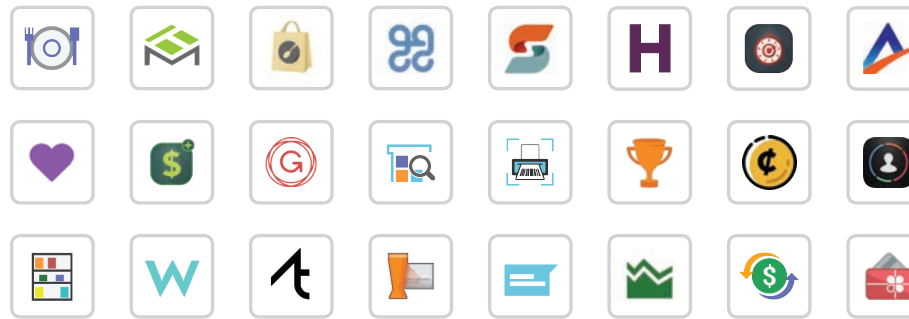

**2.9 seconds**

average transaction time for EMV® "chip" cards. That's 5x faster than other EMV® card devices – like comparing a greyhound's top speed to a chicken's.

**5x**

**220+ apps**

in the Clover App Market, helping merchants get jobs done faster and more easily – including employee scheduling, marketing, inventory, gift cards and more.

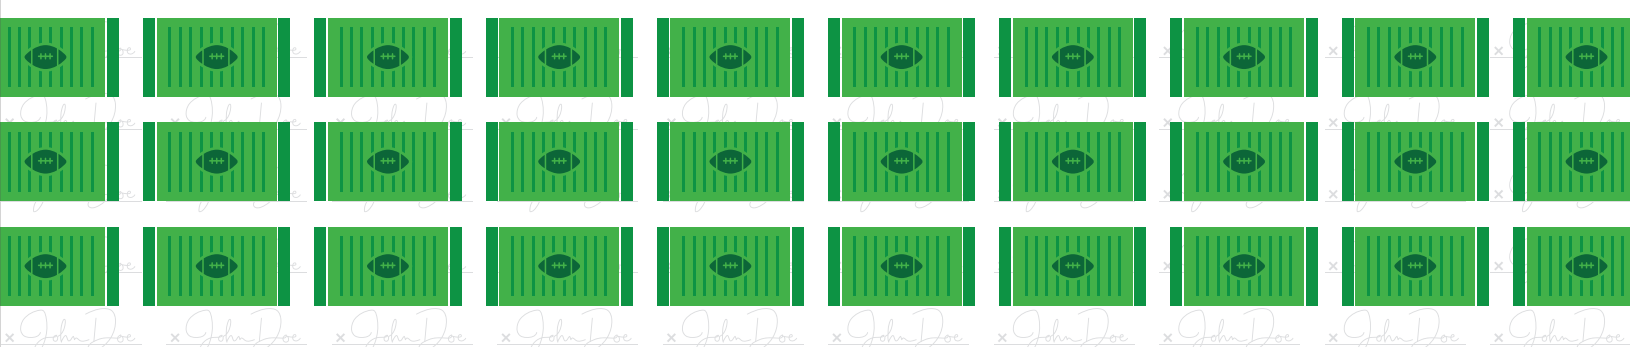

**1**  
MIN

**5,400 Clover transactions**

handled in a peak minute – secure peak performance merchants can count on.

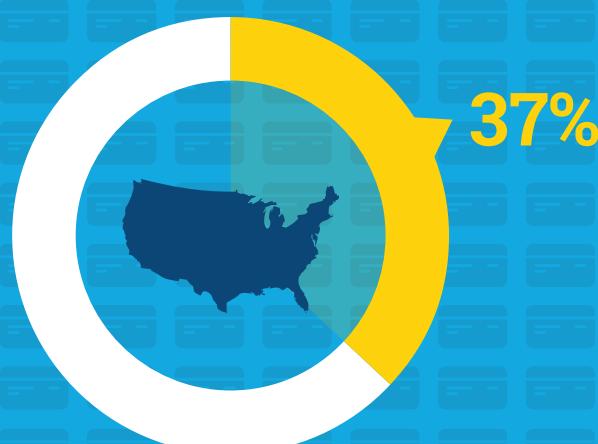

**500,000 digital signatures taken per day on Clover devices.**

Put those signatures end-to-end and they'd stretch as long as 300 football fields.

**37% of U.S. cardholders**

have purchased something from a Clover merchant.

**7.5 million feet of receipt paper saved per year,**

thanks to electronic signatures. That's as long as the Colorado River.

**82,000 feet**

is the highest altitude where Clover has accepted payment – 3x as tall as Mount Everest.

**3x**  
**2x**  
**1x**

**350,000**  
Clover Station  
swivels daily.

Each marks a shared moment between customer and merchant.

**And that's just for starters.**

Put Clover in your corner and watch your business grow.
